Work History

TruKKer Technologies Pvt Ltd 04/2022 – Present | Ahmedabad, India

Android Developer (SDE-II)

- Led the development and maintenance of Android applications for TruKKer products — TruKKer Partner and Shipper Pulse, optimizing load discovery and booking processes for fleet owners and shippers.
- Developed robust features using Java and Kotlin, including order tracking and real-time data synchronization.
- Implemented MVVM architecture to build a scalable, maintainable, and testable codebase.
- Integrated Firebase for real-time database synchronization, push notifications, and secure user authentication.
- Implemented Google Maps APIs to enable live location tracking, route visualization, and distance calculation.
- Collaborated with cross-functional teams (product, backend, QA, and design) to deliver high-quality releases on schedule.
- Built efficient network layers using Retrofit, improving API performance and reliability.
- Managed the end-to-end release process by publishing and monitoring applications on the Google Play Store.

OpenXcell Technolabs 09/2017 – 03/2022 | Ahmedabad, India

Sr. Android Developer

- Worked on multiple projects as a Senior Android Developer and Project Lead.
- Communicated with clients for requirement gathering, clarification, and regular status updates.
- Actively participated in Research & Development (R&D) for new features in collaboration with the Business Analysis team.
- Worked closely across the design, development, and delivery phases of assigned projects.
- Developed applications across fintech, healthcare, and entertainment domains based on project requirements.

iMobDev Technologies 08/2016 – 08/2017 | Ahmedabad, India
Intern

- Worked as an intern.
- Worked on POS system Application with an RFID (NFC) scanner.

Education

Master of Computer Application (MCA) 08/2014 – 08/2016 | Ahmedabad, India
Gujarat Technological University

Personal Projects

TruKKer

- TruKKer is the MENA region's largest digital freight platform. It is a cloud-based freight solution offering end-to-end logistics services and a full-service portfolio for shippers, carriers, and businesses.

Spare8 (FinTech)

- Spare8 is a micro-investing app that automatically invests the spare change from users' digital transactions into gold, enabling effortless and disciplined investing.

TheCypha

- The Cypha is a social music app that enables musicians worldwide to create, collaborate, and share music, bringing real-time collaborative singing to mobile beyond traditional karaoke.

Novique

- Novique is India's first online, physician-supervised Type 2 diabetes reversal clinic focused on lowering blood sugar and HbA1c while reducing medication dependency and supporting weight loss.

OrangePipes

- Orange Pipes is an event-sharing app that lets users build a personal calendar by posting events and giving followers a quick view of upcoming activities, including descriptions, locations, websites, and date/time details.

Car7araj:

- Car7araj is a virtual marketplace that enables users across the UAE and Gulf countries to buy and sell new or used cars quickly and hassle-free from the comfort of their homes.

I hereby declare that the above-written particulars are true, to the best of my knowledge and belief.
